WORK EXPERIENCE

Salesforce 04/2020 - 05/2023
Software Engineer

- Engineered and deployed innovative features for the In-App Guidance platform resulting in a 25% increase in Lightning adoption and a 40% increase in customer satisfaction
- Built RESTful APIs using Java and Salesforce Object Query Language for seamless communication between front-end and back-end systems, handling over 10,000 requests per day
- Developed responsive UI components using HTML, CSS, and Javascript with Aura and LWC frameworks to enhance user interaction and accessibility across various devices
- Devised detailed implementation strategies based on Figma designs for customer-requested features; presented strategies clearly and concisely to management and cross-functional team
- Leveraged internationalization and localization features to support multi-language user interfaces, expanding product accessibility and market reach to a 500% larger customer base

Persistent Systems 08/2019 - 04/2020
Software Engineer

- Designed and executed comprehensive full-stack solutions for the SaaS layer of IBM's Rational product suite, leveraging a robust tech stack including JavaScript, Java, Angular, Bootstrap, and Node.js
- Developed and maintained a streamlined build deployment system and automated end-to-end testing platform utilizing Selenium, Bash scripting, and PHP, ensuring seamless functionality and efficiency in software development processes, increasing developer productivity by 20%
- Collaborated with UX/UI designers to translate wireframes and prototypes into responsive web interfaces, ensuring consistency and usability across different devices and screen sizes

EDUCATION

Bachelor of Computer Science
North Carolina State University
Raleigh, NC, USA
